PingUp - Real-time Chat Application

GitHub: <https://github.com/Duamemon51/PingUp>

Tech Stack: **LARAVEL, JavaScript, Chatify, Pusher, Bootstrap.**

Casino Website - Online Gaming Platform

Tech Stack: **Laravel, Bootstrap, JavaScript, HTML, CSS**

- Developed a responsive, dynamic casino website featuring game listings, user authentication, and an admin dashboard.
- Handled both front-end and back-end development to deliver a seamless and interactive user experience.
- Focused on clean UI design, mobile responsiveness, and secure session management.

Prediction Trade Website - Yes/No Betting Platform

Tech Stack: **Laravel, JavaScript, Bootstrap, HTML, CSS**

- Developed a dynamic web platform allowing users to place Yes/No bets on market-based or event-driven predictions.
- Integrated Google Sign-In along with traditional user authentication for seamless and secure access.
- Implemented core features including bet placement, real-time result updates, and an admin dashboard for managing predictions and users.
- Designed backend logic for bet validation, user points tracking, and automated result processing.
- Delivered a clean, responsive user interface using Bootstrap, ensuring an intuitive and engaging user experience.

JanoubVisit - Tourism & Travel Web Application

- Developed a responsive web application using Next.js, React, Tailwind CSS, and Node.js.
- Designed an intuitive UI for exploring and booking tours in the southern region (Janoub).
- Implemented dynamic routing, API integration, and server-side rendering (SSR) for optimized performance.
- Integrated interactive map (via iframe) to enhance the travel experience and location visualization.
- Added features including tour listings, search & filter, and booking request form.
